

#### 4.2.1 Library is automated using Integrated Library Management System (ILMS)

- Name of ILMS software

**SOUL 2.0**

- Nature of automation

**Partially**

Software for University Libraries (SOUL) is a state-of-the-art integrated library management software designed and developed by the INFLIBNET Centre based on requirements of college and university libraries. It is a user-friendly software developed to work under client-server environment. The software is compliant to international standards for bibliographic formats, networking and circulation protocols. After a comprehensive study, discussions and deliberations with the senior library professionals of the country, the software was designed to automate all housekeeping operations in a library. The software is suitable not only for the academic libraries, but also for all types and sizes of libraries, even school libraries.

The SOUL 2.0 consists of the following modules. Each module has further been divided into sub-modules to cater to its functional requirements: The in-built network feature of the software will allow multiple libraries of the same university to function together as well as access to the distributed databases installed at university libraries and union catalogue mounted at INFLIBNET using VSAT network.
